RG104 E-1 Box 121

Philadelphia, 26th April —, 1880.

Sir,

I herewith respectfully present the Reports of daily workings of Silver for February and March. A similar, but worse, blending of different lots, from the irregular periods of demand by the coiner, has occurred with the Silver as with the Gold. During the week 12 to 18. February, I had to fuse them together, and some passed over into March. This last month shows such irregularities that I prefer giving two Reports, one of the whole month fused into a single line, and the other showing the irregularities and the difficulties I have had to contend with to ascertain how my account stands.)

It is quite a satisfaction, in view of the difficulties and apparent hazards to which I am subjected

RG104 E-1 Box 121

jected, to find the average losses of the month moderate, and that there was no condemnation of Ingot-metts.

Respectfully yours
L & C Booth
